

Medora

from Ramovation

Digital Marketing Plan

Overview

Ramovation is a product-driven technology company building SaaS products and delivering digital transformation solutions that make complex processes simpler, smarter, and more effective.

Medora is Ramovation's integrated SaaS platform built specifically for doctors, clinics, polyclinics, and medical centers. It connects the clinic's digital presence, patient acquisition journey, reservations, medical operations, prescriptions, business management, and ongoing patient engagement.

Vision : To become a leading healthcare management platform in the Middle East, empowering medical facilities with flexible and affordable digital solutions that simplify operations and improve efficiency.

Mission : To provide an integrated and adaptable SaaS solution that brings clinic and healthcare operations together in one centralized platform, helping doctors and medical facilities manage their work more efficiently while reducing the complexity and cost of digital management.

Purpose of Report

This report aims to develop a strategic digital marketing plan for Medora to strengthen its market presence, increase brand awareness among healthcare providers, and generate qualified leads. It also seeks to position Medora as a flexible and integrated solution for efficient healthcare management.

01

Market Research

Marcro & Micro factors affecting Medora

Market Research-PEST Analysis

Political

Government initiatives supporting healthcare digital transformation and the expansion of electronic health services create opportunities for clinic management software.

Social

Low awareness of clinic management systems and concerns about adopting new workflows highlight the need for education, trust-building, and simple user experiences.

Economical

Demand for cost-effective solutions creates opportunities, while price sensitivity, inflation, and currency fluctuations may affect affordability and operating costs.

Technological

Advances in cloud computing, electronic health records, online booking, and e-prescriptions support the development of integrated clinic management solutions, while cybersecurity and internet reliability remain important considerations.

Market Research-Microenvironment

Distributors

The marketing agency will act as Medora's distributor by supporting its market reach and promotion to potential customers. Its role will focus on marketing activities that increase product awareness, attract potential clients, and support customer acquisition.

Suppliers

Medora is developed internally by Ramovation, so there are no external suppliers directly involved in producing the SaaS product.

- Clinics needing management software.
- Features that meet clinic needs.
- Ability to afford the subscription.
- Managing all tasks in one place.
- Saving time and effort.

Fears

- Difficulty using the software.
- Risk of data loss.
- Concerns about patient data security.
- High subscription costs.
- Software not meeting clinic needs.

02

Marketing Research

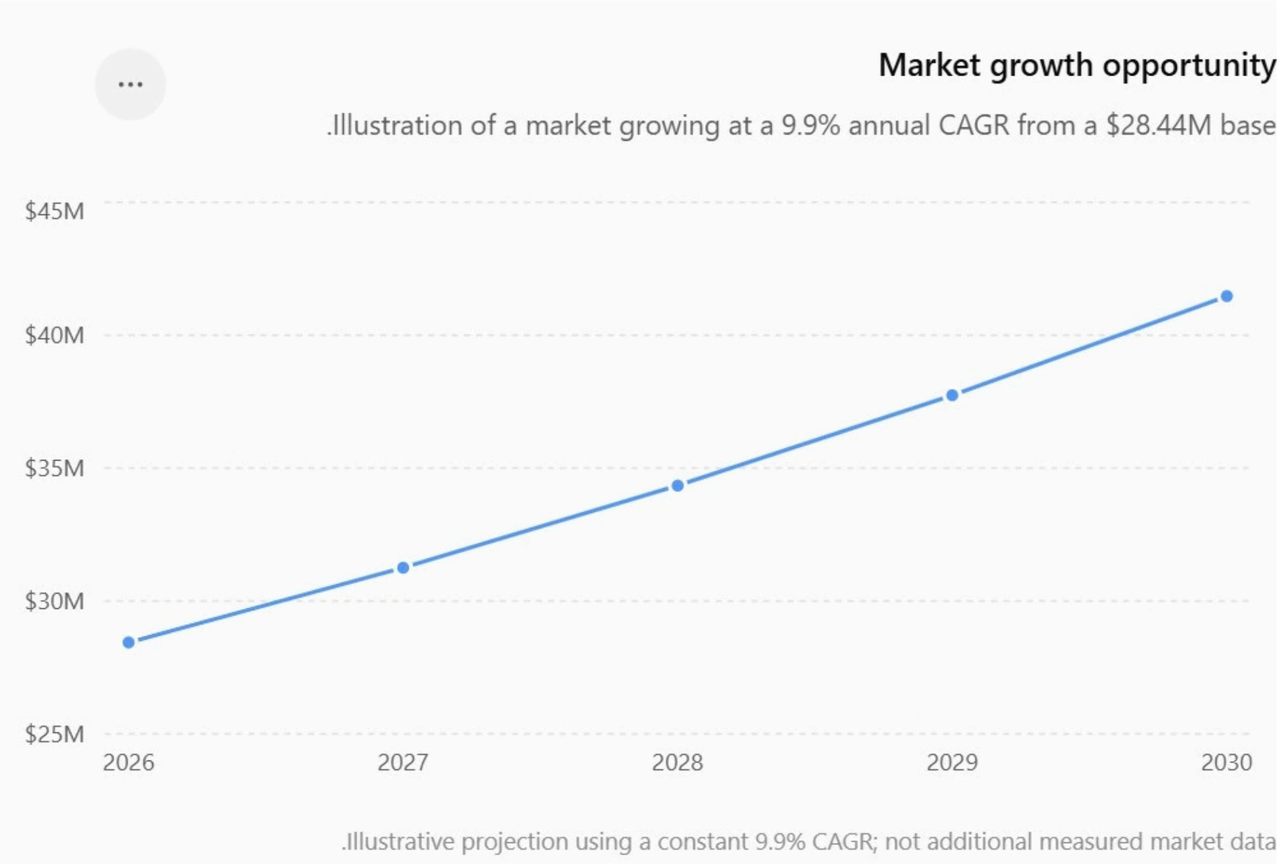

Primary & Secondary Researches

Marketing Research

According to Cognitive Market Research, the global Clinical Practice Management Software market reached USD 13.54 billion in 2024, with **the Middle East and Africa (MEA)** accounting for approximately 2% (USD 270.84 million). The MEA market is expected to grow at a CAGR of 9.6% from 2024 to 2031. **Egypt's market** was valued at USD 28.44 million in 2024, with a projected CAGR of **9.9%**, while **the Rest of MEA market** was valued at USD 31.96 million, with a projected CAGR of **8.6%**.

Marketing Research

Market Opportunity: The Egyptian clinic management software market is valued at approximately **$28.44M** and is projected to grow at a **9.9% CAGR**.

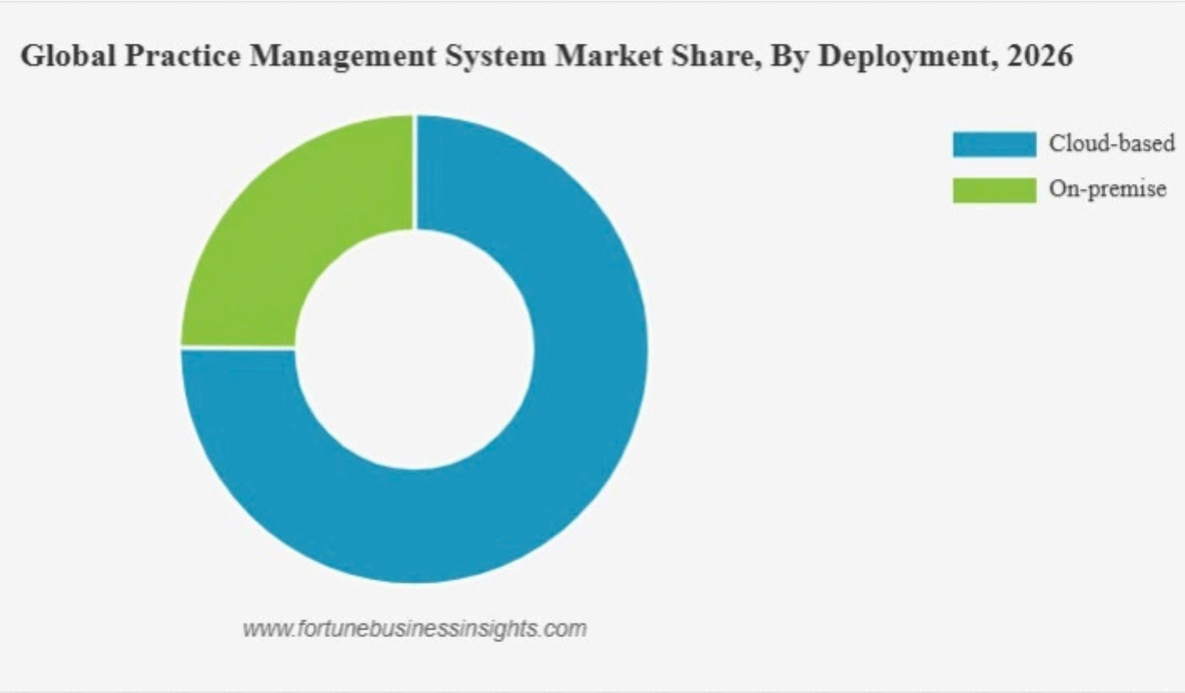

This steady growth highlights a **promising market opportunity** for digital clinic management solutions that meet the growing demand for efficient and integrated healthcare management.

Marketing Research

According to **the Egypt Healthcare Authority (EHA)**, Egypt is witnessing significant digital transformation across the healthcare sector:

- **4.5 million electronic health records** have been created for citizens under the Universal Health Insurance system.
- **42 million electronic prescriptions** have been issued, reflecting the growing adoption of digital healthcare processes.
- **100% of primary healthcare centers and units** under the EHA in covered provinces have been digitized.
- Hospitals under the Authority operate through **fully computerized workflows**.
- The digital transformation includes **electronic medical records, e-prescriptions, telemedicine, remote diagnosis, and digital data dashboards.**

Cloud-Based vs. On-Premise

The market is segmented into **cloud-based** and **on-premise** solutions. Cloud-based systems lead the market due to easier data accessibility, lower installation costs, and reduced maintenance requirements.

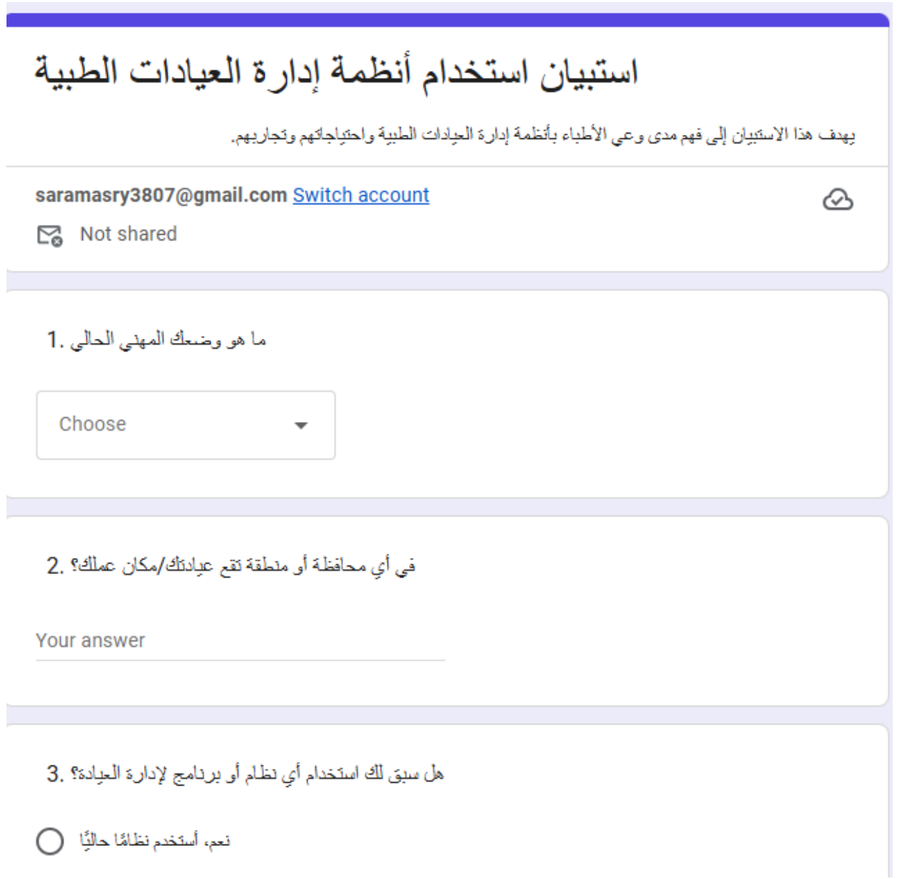

The cloud-based segment is projected to account for 75.5% of the market in 2026, while on-premise solutions hold a smaller share.

Market Insight

These figures indicate **a strong shift toward digital healthcare in Egypt**, creating a favorable environment for integrated healthcare management solutions such as Medora.

Survey

The purpose of this survey is to understand doctors' awareness of medical clinic management systems, as well as their needs and experiences. And to determine whether the respondent is a decision-maker in purchasing the system or merely a user. Link

نعم، أستخدم نظامًا حاليًا

Marketing Research-Survey

People who have done the Survey.

Marketing Research-Survey

Awareness of medical management systems remains low, with **93.3% of participants lacking a good understanding of their functions**. This indicates an awareness gap and an opportunity for Medora to educate the market and explain the system’s features and benefits in a simple, accessible way.

Marketing Research-Survey

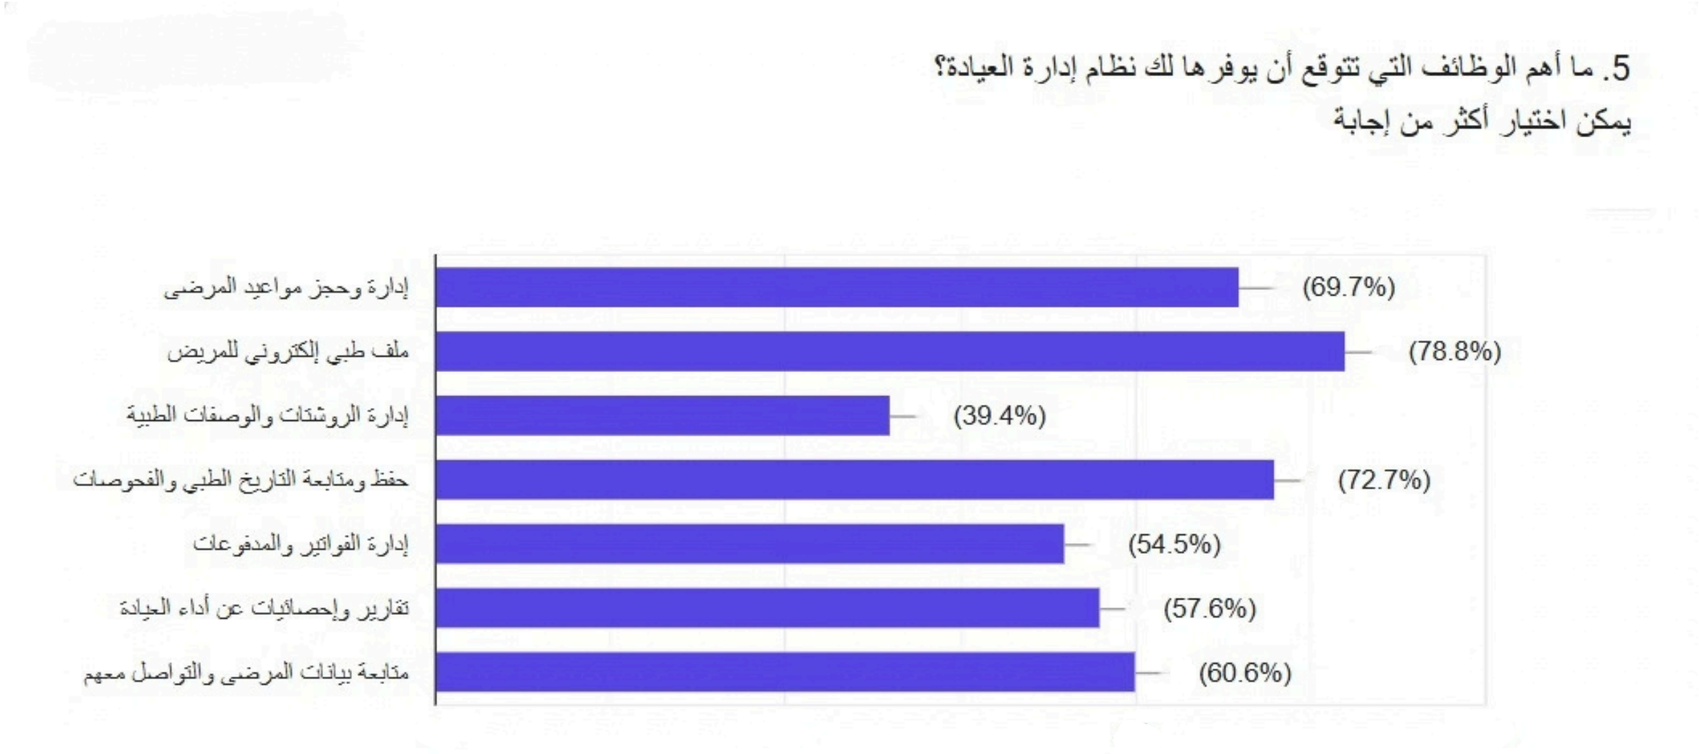

87.1% of participants do not use clinic management systems, creating an opportunity for Medora to promote digital adoption.

Marketing should highlight the system’s benefits, address daily challenges, and build trust.

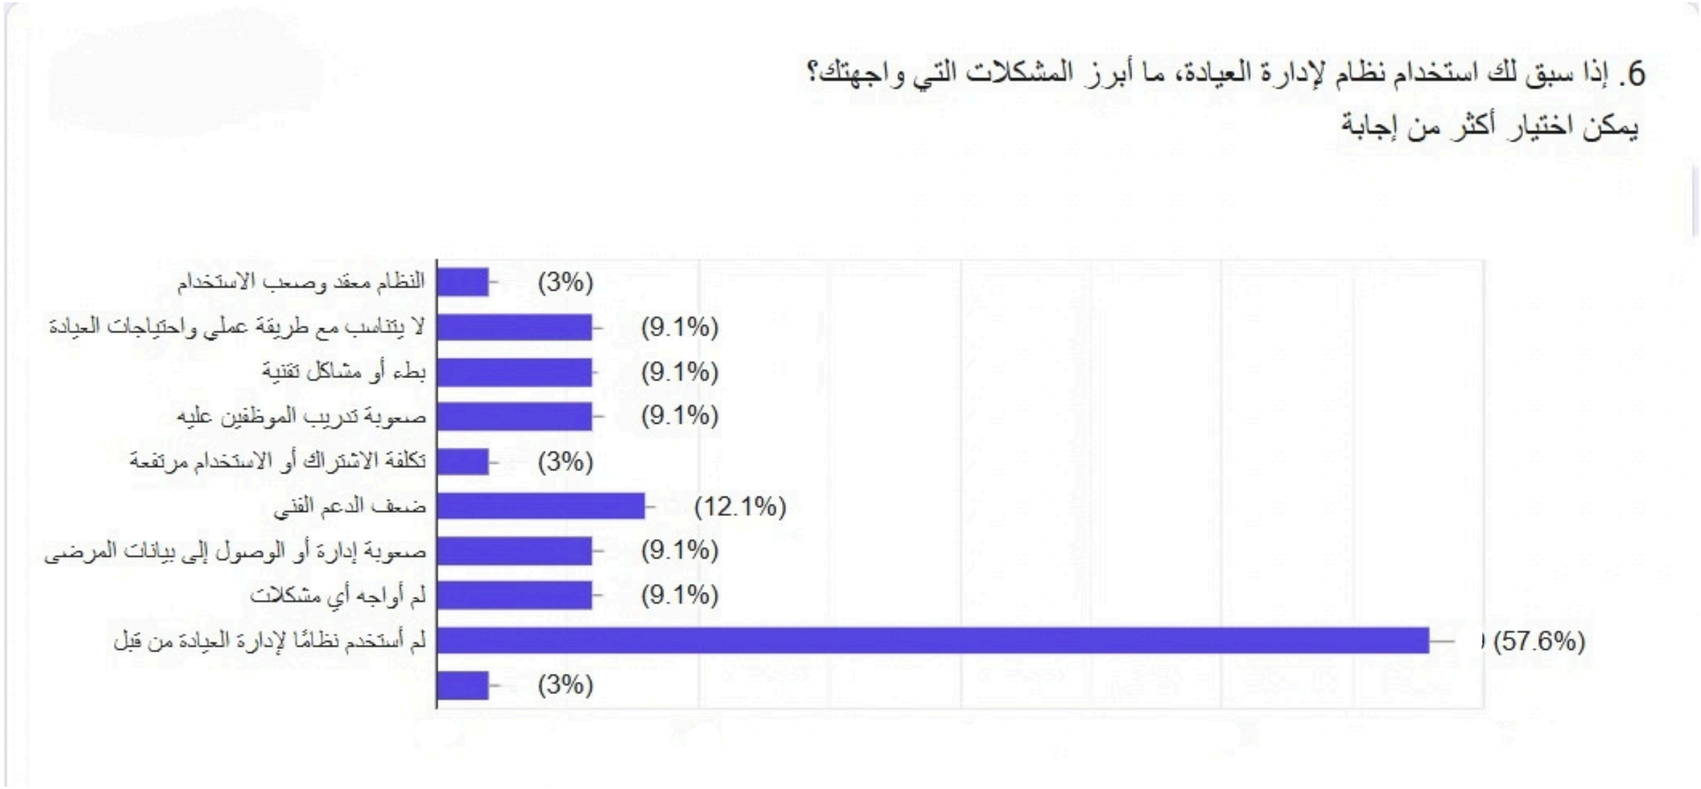

Ease of use, training, and technical support are essential to encourage adoption.

Marketing Research-Survey

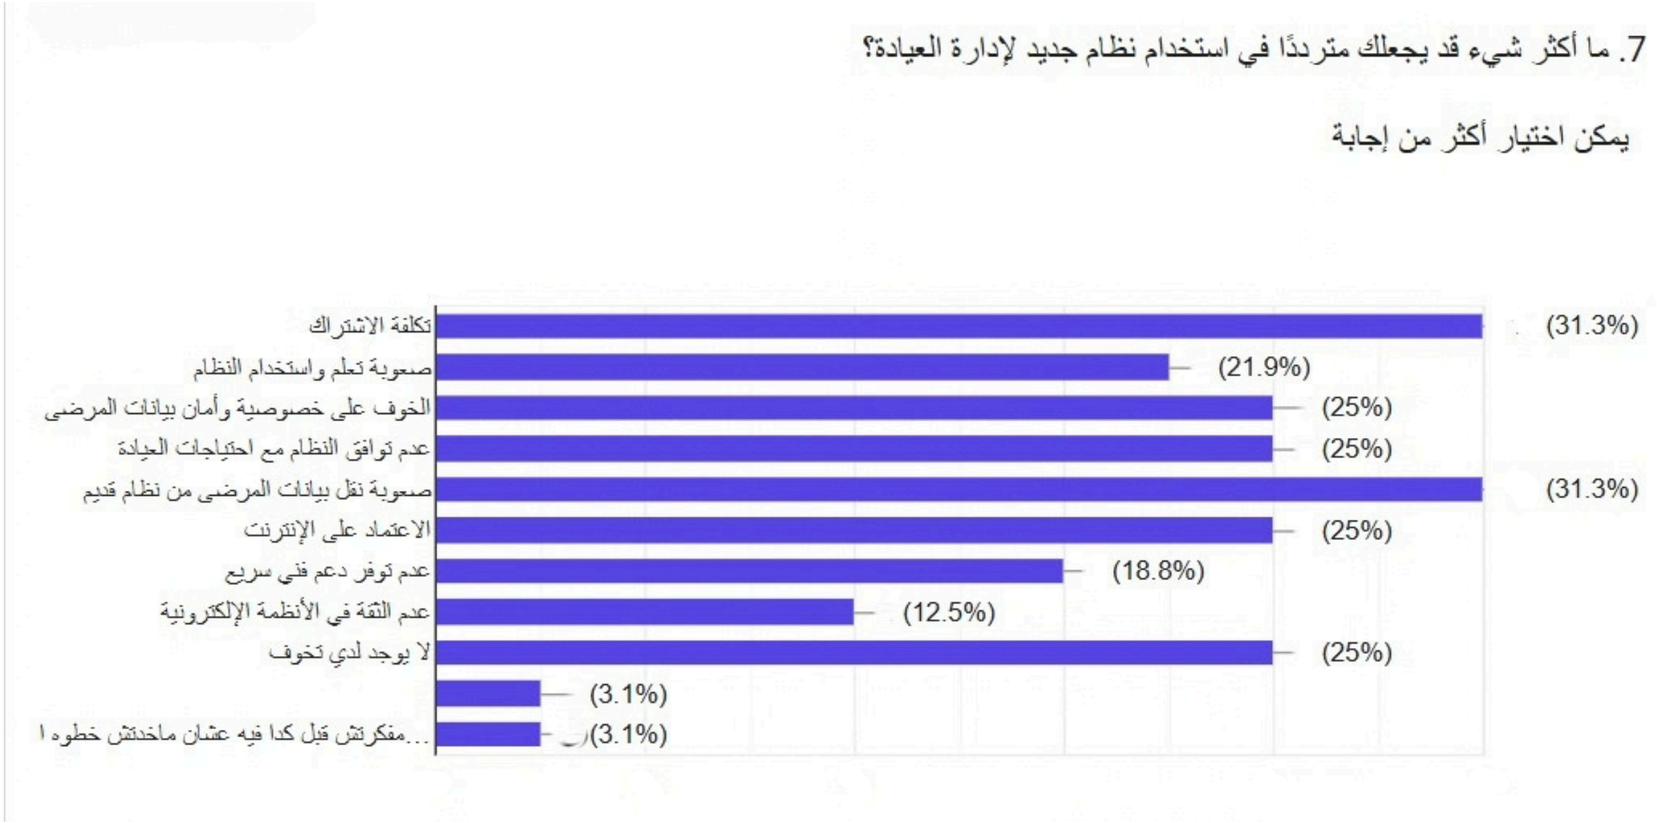

Understanding clients needs.

Marketing Research-Survey

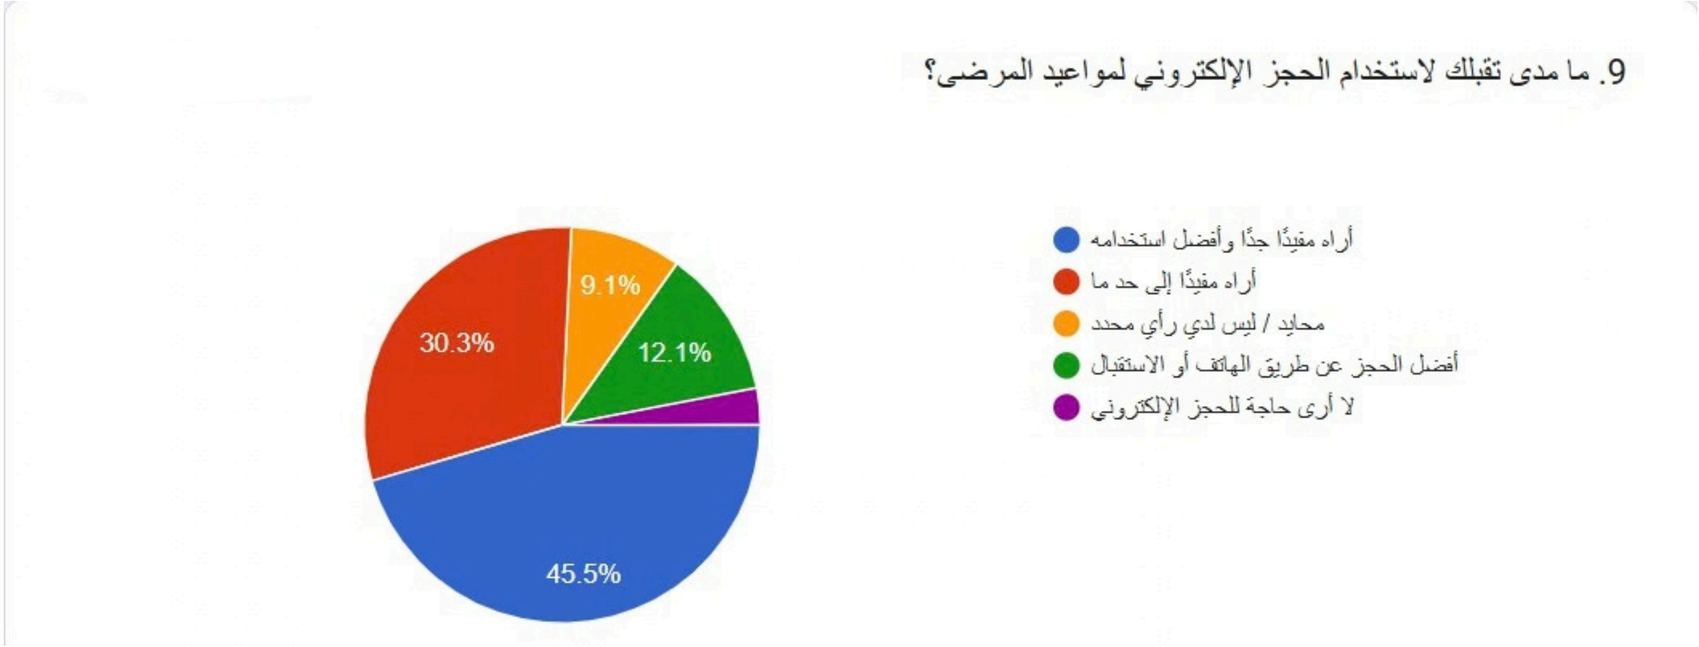

Identifying pain points in existing systems.

Marketing Research-Survey

Identifying the fears and barriers that may prevent doctors from adopting a new system.

Marketing Research-Survey

Measuring the acceptance of online booking, one of Medora’s key features.

Marketing Research-Survey

Measuring price sensitivity and identifying the expected price range among the target audience.

Summary & Recommendations

Market Opportunity

- Egypt’s clinic management software market is growing at a 9.9% CAGR, supported by healthcare digitalization and increasing adoption of cloud-based solutions.

Customer Awareness & Demand

- 93.3% of surveyed doctors lack a clear understanding of these systems, while 87.1% do not currently use one. However, around 75% view online booking positively.

Key Needs & Barriers

- Doctors prioritize electronic patient records (78.8%) and appointment booking (69.7%). Main barriers include subscription costs, data migration, and concerns about privacy and internet dependency.

Competitive Opportunity

- Competitors face reported challenges with response speed, process complexity, and Meta integration, creating opportunities for Medora to differentiate.

Key Insight: The main challenge is not rejection, but limited awareness and trust.

Strategic Recommendations: Focus on educational content, demonstrate data security and ease of use, offer flexible pricing, and differentiate through simplicity and responsive support.

***Note:** Survey findings are preliminary due to the small sample size.
